DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 8-10, and 18-20 rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent 4,307,096 to Takeyama in view of US Patent 6,374,644 to Rhode et al.

3. Takeyama teaches a laundry dryer with rotatable drum 1 and stationary drying rack comprising gridded surfaces bottom 51, sides 52, rear 53, wherein the surfaces are connected to one another by pivoting hinges 55, enabling inner access at all surface edges, and the rack is connected to the drum with fastening devices 8. Note Figures 2, 3, and 8. Takeyama does not teach a surface disposed above the bottom surface or surfaces with netting and a frame. Rhode et al. teaches a similar drying rack comprising opposing parallel planes 22 and 20 formed of a wire mesh with a frame. Note column 5, lines 46-55 and Figure 1. As Rhode et al. teaches that supplying a top to a drying rack will help to ensure that articles being dried will remain inside the rack, and that mesh with a frame will provides an effective barrier for articles being dried, it would have been obvious to one of ordinary skill in the art to modify the drying rack of Takeyama with the opposing surfaces comprised of mesh and frame taught by Rhode et al. Regarding claim 9, Takeyama, as modified by Rhode et al., does not teach the

thickness ratio claimed. However, such a limitation would have been obvious to one of ordinary skill in the art since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

Allowable Subject Matter

4. Claim 21 is allowed.
5. Claims 6, 7, and 11-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

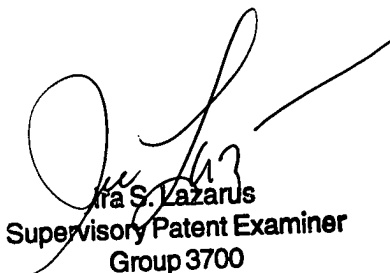

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Barnard, Herr, Daily, Laue et al., and Lauck teach similar drying racks.
